Location *Managua, Nicaragua*

EDUCATION

Systems Engineering
Universidad Centroamericana
2016 - 2021

LANGUAGES

Spanish - English

SKILLS

Programming Languages
PHP - JavaScript - Typescript

Backend Frameworks
Laravel - Node.js

Frontend Frameworks
Vue.js - React - Angular

Web
HTML - CSS - Tailwind - Bootstrap

Databases
MySQL - PostgreSQL

Tools
Git - Docker

Integrations
Meilisearch - Mixpanel - Stripe - DomPDF

ABOUT ME

Fullstack Developer with 7+ years of experience building and modernizing web applications across cybersecurity, healthcare, and telecommunications industries.

Skilled in Laravel, React, and Vue.js, with a strong track record of migrating legacy systems to modern stacks, optimizing application performance, and delivering production-grade software. Experienced in mentoring developers and leading small teams, with a growing focus on leveraging AI tools to improve development efficiency and code quality.

EXPERIENCED

Mid. Fullstack Developer • NetDiligence (through Kubikware)

Dec 2024 – Current (Remote)

Migrated legacy platforms in the cybersecurity domain from vanilla PHP/jQuery to a modern Laravel + React stack, improving maintainability and development rate.

Applied Laravel best practices — resource and invokable controllers, clean architecture — to keep the codebase consistent and easy to extend.

Integrated Meilisearch to power fast, relevant search functionality across the platform.

Leveraged AI tools (e.g., Copilot/Claude) to accelerate development, improve code quality, and streamline problem-solving workflows.

Mid. Fullstack Developer • Downshift

Jun 2024 – Apr 2025 (Part time - Remote)

Translated Figma designs into pixel-perfect, responsive React components, ensuring consistent UI/UX across device types and breakpoints.

Contributed to existing Node.js backend services by integrating Mixpanel analytics across key user flows, enabling data-driven product and feature decisions.

Web Developer Mentor • GoIT

Aug 2022 – May 2024 (Part time - Remote)

Mentored students through a full-stack curriculum, from HTML, CSS, and JavaScript fundamentals to advanced technologies like Node.js and React.

Led junior teams in building responsive React projects, guiding them in applying their skills to real-world, collaborative development scenarios.

Mid. Fullstack Developer • ImplementHIT

Jun 2021 – Nov 2024 (Remote)

Developed SPAs and Web APIs for US-based medical sector companies using Laravel, Vue.js, and MySQL, delivering HIPAA-compliant, healthcare applications.

Optimized application performance and response times through database indexing, eager loading, queued jobs, and Redis-based caching strategies.

Implemented unit and feature test suites to ensure code reliability, and integrated third-party libraries for tasks such as automated Excel and PDF report generation.

Jr. Developer • VitalPBX
Oct 2019 – May 2021

Built an SPA using Vue.js and Laravel to support collaborative project translations, and developed "Vitxi," a mobile Android VoIP application.

Migrated a legacy call-rate software system from VB6 to .NET Framework using Visual Basic and the DevExpress library, modernizing a critical business tool.

Intern Jr. Fullstack Developer • Fitness Core Center
Jan 2020 – Jun 2020

Developed a web platform to manage gyms and exercise routines, using Laravel as a web API and Angular.

Intern in the Reports and Development Area • Bee Business Suite
Feb 2019 – Sep 2019

Migrated a desktop ERP in .Net framework, with multiple reports in ActiveReports.

UNIVERSITY VOLUNTEER

Volunteer Web Application Project Manager • Kolping Nicaragua
Jun 2017 – Mar 2018

As part of my university volunteering. Analysis, design and implementation of a Java Web application that keeps track of the effects and impacts of multiple projects.
Servlets technologies, JSP pages and Jasper reports were used.
